PROJECTS

Coach Me

[GitHub Repo](#) | [Deployed Link](#)

Full Stack Developer, July 2020

Coach Me is a React web application that allows health coaches to be paired up with users with high risk conditions such as diabetes or heart disease. The coaches can track progress and help improve management of their conditions.

HTML | JavaScript | React | SASS | Node JS | Twilio | AWS | Socket.io

- Collaborated remotely with a team of 6 web developers to build a production level web app in 3 months
- Set up end points on back end for health coaches
- Solely responsible for creating seed data

GigaPet

[GitHub Repo](#) | [Deployed Link](#)

Front End Developer, Feb. 2020

GigaPet is a React web application that encourages children to make healthier choices. The app allows them to track their food and encourages them when they eat healthy.

HTML/CSS | JavaScript | React | Styled Components

- Collaborated remotely with a team of 5 web developers to build a fully functional web app in 2 weeks
- Solely responsible for
 - User registration and authentication
 - Responsive styling
 - All forms

One Line A Day Journal

[GitHub Repo](#) | [Deployed Link](#)

Front End Developer, Sept. 2019

One Line A Day Journal is a React web application that allows users to write small journal entries for each day of the year.

HTML/CSS | JavaScript | React | Styled Components

- Collaborated remotely with a team of 6 web developers to build a fully functional web app in 2 weeks
- Set up user registration and login with JWT
- Set up most of responsive styling along with one of my team members
